

SKILLS

- Data analysis and preparation
- Python and SQL
- Statistics and quantitative modeling
- Data cleaning and quality
- Exploratory analysis
- Automation
- Data visualization
- KPIs and reporting

TECHNOLOGIES

Data

pandas · scikit-learn · Jupyter · PostgreSQL

BI

Power BI · Power Query · DAX

Development

Python · Java · APIs · XML · VBA · testing

PORTFOLIO LANGUAGES

French · English

INTERESTS

Chess · Poker

MOBILITY

Driver's license and own vehicle

PROFILE

A developer turned Business Data Analyst, I transform unclear business questions into reproducible analyses, decision-support tools and clearly explained results. I make scope, error and limitations explicit.

PROFESSIONAL PROJECTS

Dareboost - Development and maintenance of an API for a web performance SaaS product.

Capgemini - Java tool for remote server management using XML configuration files.

Capgemini - Comparison of XML messages received from two APIs and display of differences.

Capgemini - VBA packaging automation.

FIVE SELECTED DATA PROJECTS

BottleNeck - ERP/Web reconciliation, join controls, 714 products and a tested pipeline.

Power BI - Monitoring €2.41M in net sales, margin, inventory and prioritized recommendations.

Real estate ML - 275 assets valued, with a measured mean error of 10.8%.

UOI Games - Market study, segmentation and exploratory regression to frame an AAA launch.

Retail Insight 360 - Relational model, 17 SQL queries, NPS and consistency checks.

EXPERIENCE

2020-2026 · Freelance developer
